

Connecting Your Savvas Realize Account to Google Classroom

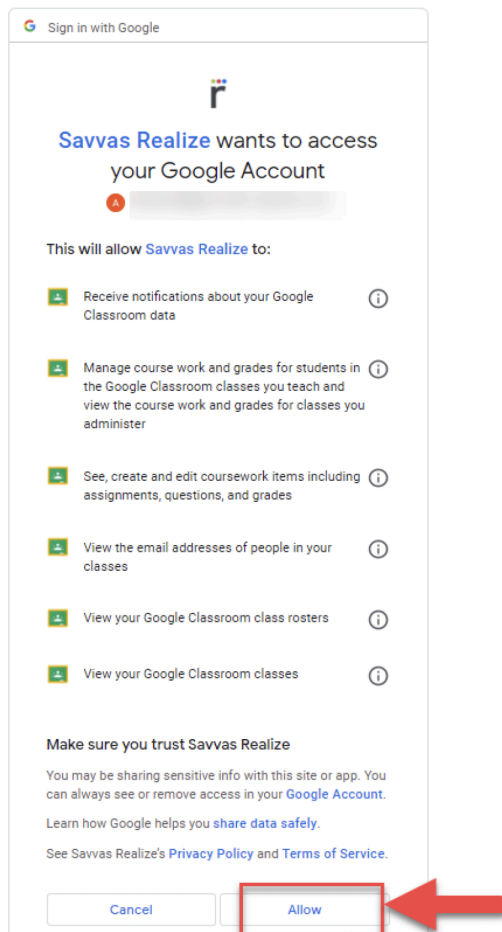

For easy classroom use you have the option to connect your Google Classroom to Savvas Realize. This means anything you assign from MathUP Student **or** Sankofa K-3 will go directly to your Google Classroom. If you choose to connect your Savvas Realize account to your Google Classroom, students will not need to go to Savvas Realize to log in and can access everything through Google Classroom.

1. In SavvasRealize, select the Classes menu and click the “Import Google Classes” button:

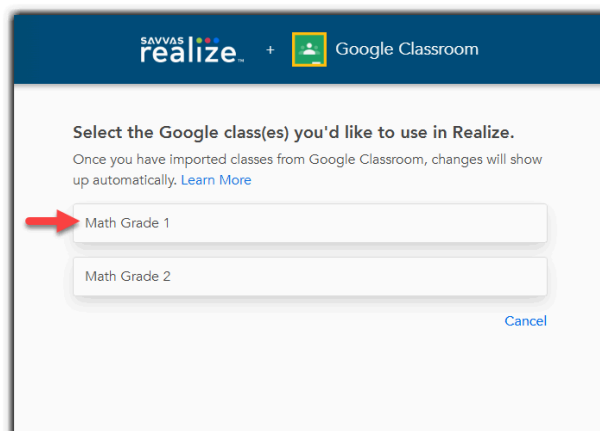

2. When you select “Import Google Classes”, you will go through a series of screens shown below. Choose your **school/district Google account**, and **Log in**.

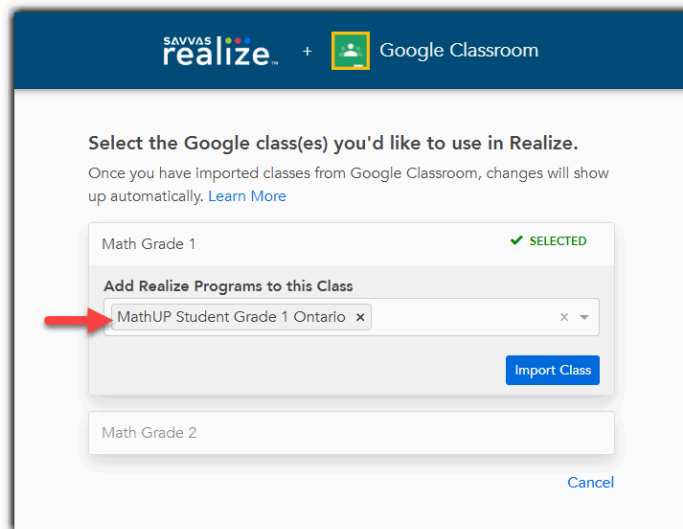

3. Now SavvasRealize has been granted access to your Google Classroom, so you will go through the following screens to **complete the connection** with your Google Classroom class.

- **Select the Google Class(es) you'd like to use in SavvasRealize:**

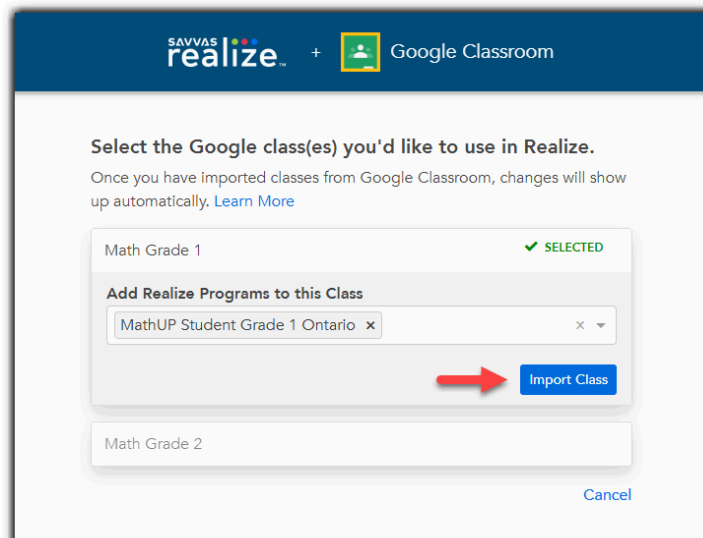

- **Select programs for the classroom** by clicking the drop-down menu, and selecting the program you wish to use:

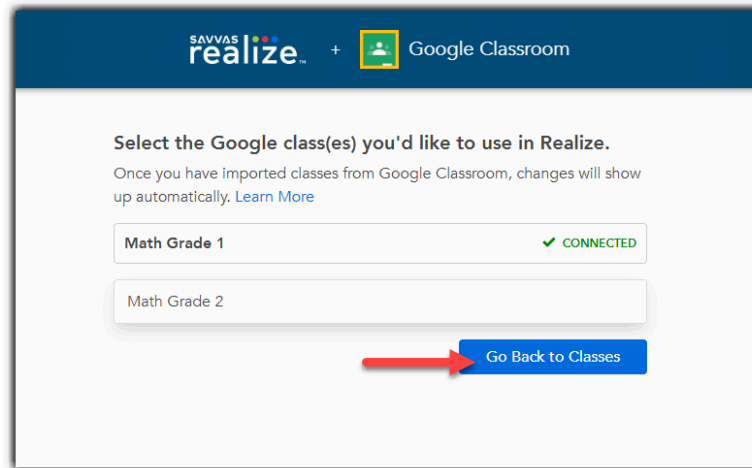

The screenshot shows the 'realize.' logo and 'Google Classroom' header. Below, it says 'Select the Google class(es) you'd like to use in Realize.' and 'Once you have imported classes from Google Classroom, changes will show up automatically. [Learn More](#)'. A dropdown menu is open, showing 'Math Grade 1' with a green checkmark and 'SELECTED' label. Below the dropdown, it says 'Add Realize Programs to this Class'. The dropdown menu is open, showing 'MathUP Student Grade 1 Ontario' with a red arrow pointing to it. There is an 'Import Class' button and a 'Cancel' button at the bottom right.

- **Import your Class** by selecting the Import Class button:

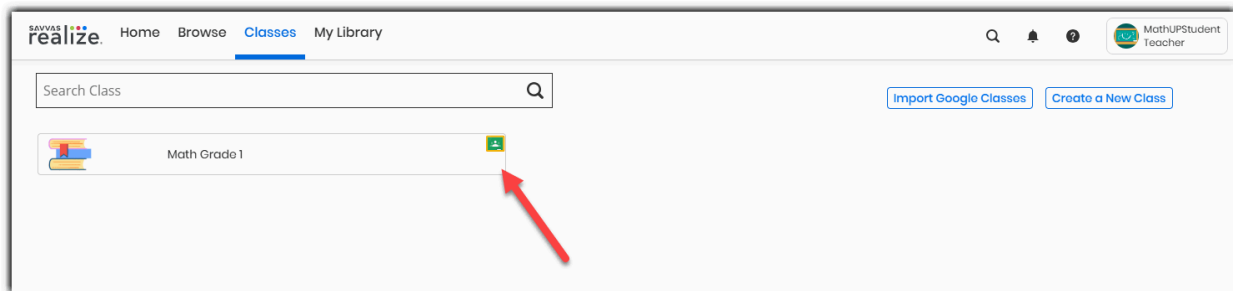

The screenshot shows the same interface as the previous one, but with a red arrow pointing to the 'Import Class' button. The dropdown menu is still open, showing 'MathUP Student Grade 1 Ontario'.

- **Go Back to Classes in Realize:**

The imported **Google Classroom** is now in **Realize**. Imported classes display the Google Classroom class name and a Google Classroom icon.

Now **everything** you assign in **MathUP Student** or **Sankofa K-3** will **automatically** be assigned in your **Google Classroom**.
